

Infrared lamps for PET processing

Victory has a comprehensive range of linear quartz infrared lamps for industries using PET (PolyEthylene Terephthalate) in products such as food packaging and beverage containers.

The high quality and longevity of Victory PET lamps means they are used world-wide by many machine manufacturers.

Trusted by manufacturers

- High efficiency: reduced running cost
- Life 5000+ hours: reduced replacement cost
- Most energy-efficient reflector coating
- Compatible with all machine models
- Clear or ceramic coated
- Clear lamps compatible with external reflectors
- 1000W - 3000W

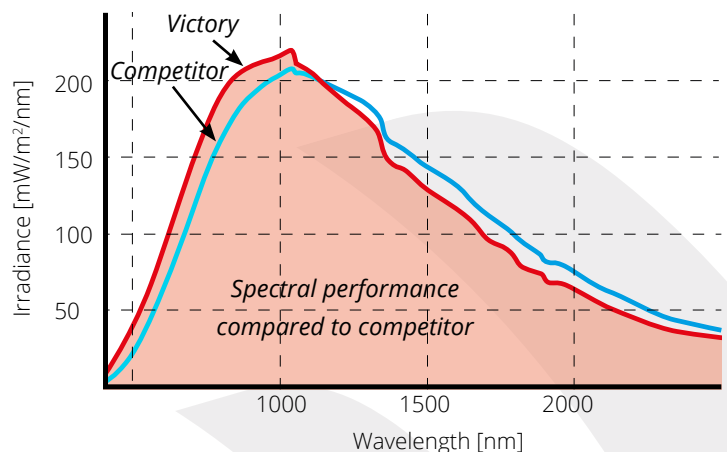

Integrated reflectors

Victory PET lamps have a built-in ceramic reflector system that focuses infrared energy forward in the direction where it is required, reducing the loss of heat to the rear and improving efficiency. Infrared heat is emitted forward through the quartz tubing, or reflected off the back of the tube to then pass out through the front.

Best performer

Victory infrared PET lamps provide more energy output per watt than their major competitors so will **save on energy cost**.
