Twin Tube Infrared Lamps

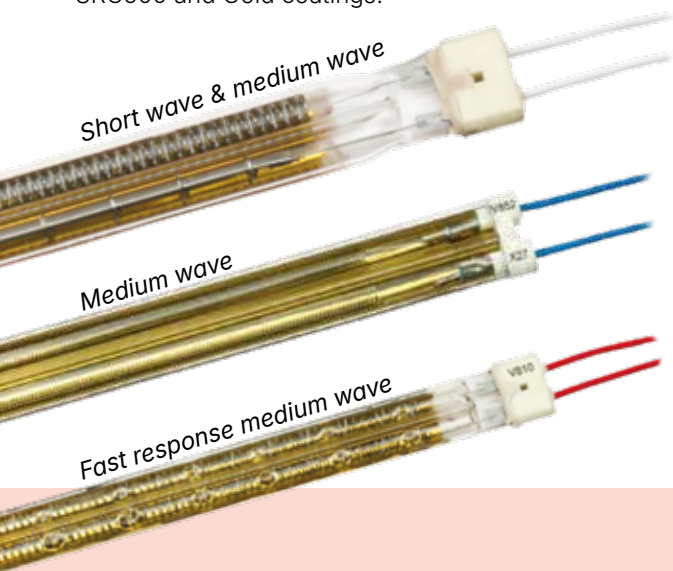

Twin Tube Lamps

Victory has a long history of expertise in producing high quality infrared emitters for a wide range of industries.

These include a broad range of twin tube lamps for a variety of industrial processes. They include short wave, medium wave, carbon and fast response medium wave lamps, in a number of single ended and double ended configurations.

Twin Tube Lamps

Victory twin tube lamps are made of high quality quartz and were designed by Victory's engineers to yield high radiation power as well as to provide excellent mechanical stability. They are available as clear, or coated with Victory's renowned SRC500 and Gold coatings.

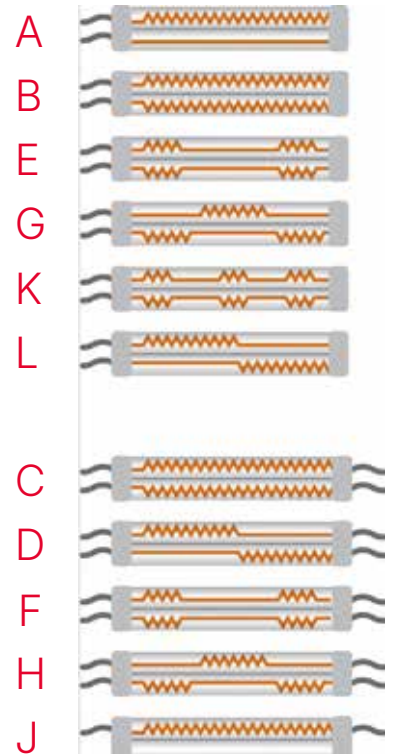

High power with high quality

- High quality quartz
- Excellent mechanical stability
- Clear or coated
- Single or double ended connections
- Industry standard 'ABC...' lamp types

Applications include:

- Printing industry
- Plastics processing
- Food processing
- Curing
- Finishing
- Lacquer drying

Lamp types

Technical Data

TWIN TUBE INFRARED LAMPS

Numerous benefits

Infrared Twin Tube lamps offer numerous benefits across a wide range of applications and industries due to their high efficiency, rapid heat-up and cool-down times, and uniform heat distribution.

These lamps are ideal for processes requiring precise temperature control, such as drying, curing, and forming in industries like automotive, textiles, packaging, and electronics. Their compact design allows for targeted heating in confined spaces, reducing energy consumption and improving process speed. Additionally, their long operational life and low maintenance needs make them a cost-effective solution for industrial heating applications.

Personalised solutions

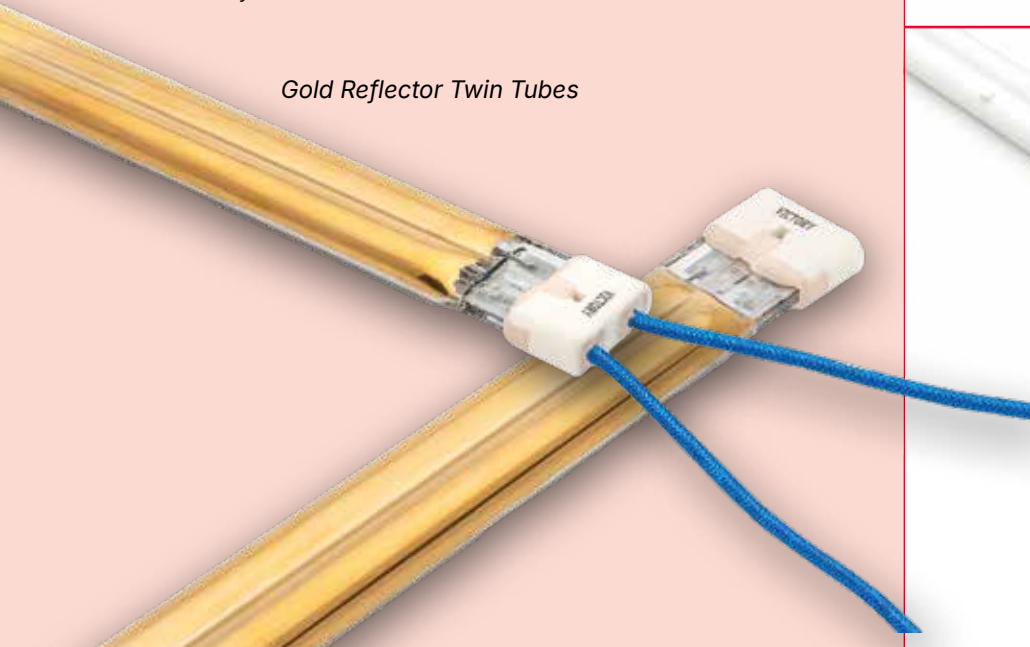

We offer fully personalised solutions to meet the unique requirements of each customer.

Whether it's modifying size, wattage, wavelength, or connection type, our dedicated and highly experienced technical team work closely with clients to develop tailored heating solutions that deliver optimal performance. With a strong focus on collaboration and problem-solving, we ensure each product is precisely engineered to suit the application, helping customers achieve efficient, reliable results across a variety of industries.
