Hard Glass Infrared Lamps

Hard glass lamps made from borosilicate glass offer excellent thermal and chemical resistance, making them ideal for demanding environments. When red-doped borosilicate is used, it provides a permanent, stable color without the need for potentially hazardous lacquers, which can degrade over time or emit harmful substances when heated. This enhances both safety and durability while maintaining consistent optical performance throughout the lamp's lifespan.

Product features

- 75% of the visible light is reduced with red filter
- Neck moulded to ensure caps will not come loose
- 5000 hour life

Applications

- Catering
- Agricultural
- Paint drying
- Personal care

Hard glass clear

Hard glass red

PAR

G30 Round
