UV LED Paint Dryer

VICTORY

ULTRAVIOLET

UV LED Paint Dryer

UV curing, with its exceptionally fast drying times, is an ideal solution for curing paints, varnishes, and other specialised coatings. Unlike conventional drying methods, UV technology can cure coatings in just minutes. This rapid drying process helps ensure a more consistent and high-quality finish, as there is less time for dust or other contaminants to settle on the surface.

In addition to its fast drying times, ultraviolet (UV) technology emits minimal heat. This makes it suitable for use on heat-sensitive materials such as fabrics, plastics, and wood.

Tests using paints from one of the world's leading manufacturers have shown that this UV dryer is especially effective with aerosol-based spray paints. As a result, UV paint drying is becoming increasingly popular thanks to its many advantages.

The UV Paint Dryer from Victory features 20 ultraviolet LEDs and is designed for efficiency and durability. The lamp has a projected lifespan of 40,000 hours and consumes just 48 watts of power.

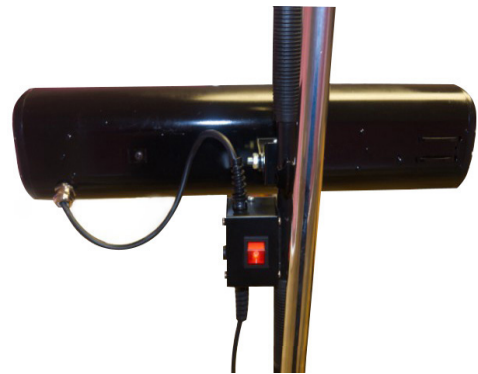

Applications

- Automotive Paint Drying
- Bodywork Repairs
- Drying Varnishes
- Coatings on Wood Products
- Curing Coatings on Plastics
- Drying of Heat Sensitive Materials

UV LED Paint Dryer

The dryer can be easily turned on and off using the rocker switch located at the rear of the unit. A 45-degree fixing bracket allows the unit to be tilted up or down to achieve the desired angle. While the unit is designed for handheld use, an optional stand is also available. Additionally, we offer an optional timer switch for added convenience.

Energy Efficient

UV paint drying is growing in popularity thanks to its low running costs and enhanced sustainability. As a more environmentally friendly solution, it supports greener practices while delivering efficient performance. Our UV paint dryer's power consumption is only 48W and drying times can be as low as only 20 seconds.
