

VICTORY
ULTRAVIOLET

Your Partner in IR
and UV Technology

UV Curing Systems

Why work With Us?

With over 30 years of manufacturing expertise in Infrared and Ultraviolet technologies, we are dedicated to delivering tailored solutions that maximise performance, solve challenges, and drive long-term value for our customers.

We are...

DEDICATED to finding the right solution

NIMBLE AND FLEXIBLE

PRICE COMPETITIVE so you can experience the benefits of our solutions

Acquisition of DPL Industri

Victory acquired DPL Industri, a respected leader in industrial heating and lighting systems. DPL's proven heritage in UV-LED and IR technology aligns perfectly with Victory's dedication to deliver world-class solutions across industrial sectors.

Discover how our innovative approach can **revolutionise** your manufacturing processes, **enhance** efficiency, and **elevate** the quality of your products.

Proudly Made in Britain

As proud members of the **Made in Britain** initiative, Victory is dedicated to manufacturing excellence, sustainable growth and local supply chain integrity.

Our UK-based production ensures:

Trusted lead times

High-quality standards

Transparent, traceable sourcing

Support for skilled British jobs

The **MADE IN BRITAIN** mark stands for trust, sustainability, and responsible manufacturing practices - values we proudly uphold.

INNOVATION & PRODUCTION CENTRE

Located adjacent to our UK headquarters, our Innovation and Production Centre is home to the design and manufacturing of our renowned UV Curing Systems.

Our products are engineered for global markets and supported by local expertise. From **ADVANCED R&D** to **EFFICIENT MANUFACTURING** and **INTERNATIONAL DISTRIBUTION**, our customers benefit from reliable lead times, global reach and dedicated service.

Industrial Applications

Victory's advanced UV and IR systems power mission-critical processes across diverse industrial applications, including:

PRINTING | COATING | CURING | BONDING

Our solutions are engineered for seamless integration, delivering:

Consistent quality

Process efficiency

**Material performance
enhancement**

**Speed
and sustainability**

Whether you're upgrading existing systems or developing a new process, our technology ensures high precision and performance.

Cold UV Curing System

- Lower curing temperatures protect heat-sensitive substrates
- High-efficiency UV energy output
- Superior uniformity for even results
- Plug & Play integrated system for easy installation

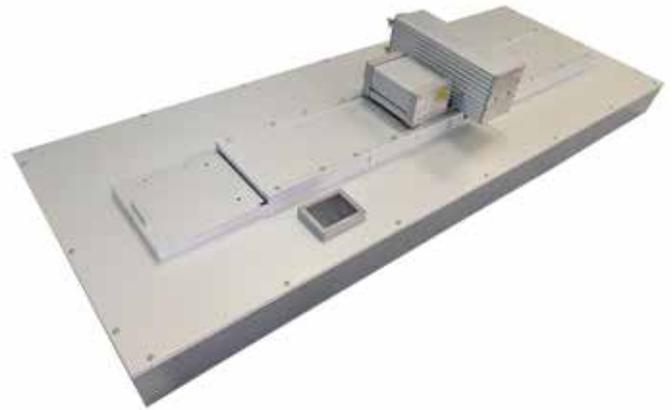

UV LED System

- High-energy UV output for rapid curing
- Long operational lifetime
- Efficient cooling ensures system reliability and longevity

Speedy Ink Testing System

- Ultra-fast testing cycles
- Environmentally friendly alternative to solvent-based curing
- Ideal for lab testing, ink formulation, and UV compatibility

UV LED Embosser

- Reliable, consistent curing performance
- Integrates seamlessly with Cold UV or UV LED systems
- Compact and energy-efficient design

Air-Cooled UV LED System

- Modular, scalable architecture
- Reduced operational and maintenance costs
- High-intensity output without water cooling infrastructure

We Have A Solution For You

With our experienced R&D and commercial teams, we're ready to collaborate and tailor a solution to your specific application.

Our lamps deliver on...

**Quality &
Performance**

Reliability

**Extensive
application uses**

**Price Value &
Fast Lead Times**
