Trojan UV4000 Replacement UV Lamp

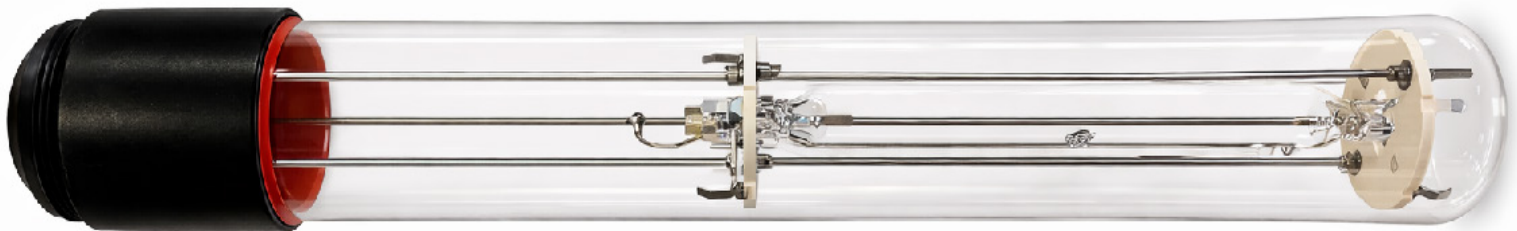

Trojan UV4000 Replacement UV Lamp

The Trojan UV4000 Replacement UV Lamp is designed to restore optimal UV performance in Trojan UV4000 systems. It delivers consistent UV output to support reliable water disinfection while maintaining the efficiency of your existing unit. With a direct-fit design, the lamp allows for quick and straightforward installation, reducing service time and system downtime. Built for dependable operation and extended service intervals, it provides a practical solution for routine.

Features and Benefits

- Compatible replacement
- Reliable UV output
- Direct-Fit design
- Reduced downtime
- Durable performance
- Maintenance friendly

- **Compatible Replacement Lamp** - Designed specifically for Trojan UV4000 systems to restore proper UV performance and maintain effective water treatment.
- **Reliable UV Output** - Provides consistent ultraviolet light to support dependable water disinfection and system efficiency.
